

ACCESS CONTROL

Customizable Electronic Door Access

Access Manager is TotalCard's door access control system tailored specifically for colleges and universities. Access Manager is a user-friendly access control software that allows for easy assignment of credentials and access privileges. No matter what the size of your campus, Access Manager can help take your campus security to the next level. As a Mercury Security, Allegion, ISONAS, and ASSA ABLOY partner, we offer trusted and reliable hardware options, allowing you to completely customize your system to meet your campus' needs. Plus, you can feel safe and secure at all times, knowing our system is backed by years of industry-proven success.

"TotalCard Access Control was really simple to implement on our campus and now we can easily monitor the status of doors in particular buildings along with the comings and goings of students and faculty."

Security Director

Key Features & Benefits:
