

# Test Station Management

## Mobile Solutions®

Mobile Solutions® provides an automated identification, registration, and tracking solution - perfect for quick, efficient and accurate on-site testing. Identify attendees as they are parked in line and quickly process each person as they are tested for COVID-19.

Using the Mobile Solutions Cart, quickly collect attendee ID data, issue an ID label with a QR, and register them into the event.

As they arrive at the test station, administrators scan their ID label to check them into the testing area, perform testing and scan the test kit assigned to them. With Mobile Solutions, your team can efficiently identify, track, and manage long lines of patients at any location.

### IDENTIFY

- > Identify recipients as they wait in line at test site locations by scanning their driver's license.  
*\*If no state ID/DL is available, manually enter data into Mobile ID.*
- > Type phone # into QR generator app/webpage & scan.

### ISSUE

- > Print an identification label from the MS cart, displaying their DL & phone #s.
- > Staff may collect printed labels at the testing station.
- > Perform COVID-19 test on recipient.

### TRACK

- > Scan the QR barcode on the recipient's ID label to check them into the event, then scan the test kit to assign the test to them.

## \*Mobile Solutions® Cart Configuration

### Mobile ID Spot

Mobile ID Spot reduces long wait lines by identifying recipients and issuing printed labels quickly on-site before enrolling them within seconds by scanning their printed QR tag ID at the test station.

### Mobile ID 1.0

Manage recipient data including contact info, phone number, & identify test kit ID numbers.

*\*Requires internet access.  
Carts powered by Anton Bauer swappable batteries supporting 100% uptime.*

### Mobile Solutions Cart

An integrated, mobile cart solution using Mobile Solutions software and hardware to perform identification, tracking and accountability of any test site location.

### Emergency Event Manager

Emergency Event Manager Software (EEMS) is an accountability solution that enables organizations to track attendees and manage an emergency incident scene on-site electronically, using an automated process that captures and manages event activity data.
