DATACARD® IDCENTRE™ VIEW IDENTIFICATION SOFTWARE

IDCentre View software lets you add visual verification checkpoints across your enterprise. It is ideal for corporate, education and government environments

Expand visual verification cost-effectively

Datacard® IDCentre™ View identification software makes it easy to add checkpoints for visual verification and information access, as well as enhance image retrieval. It offers an affordable way for corporations, schools, government agencies and membership organizations to increase security while leveraging your current investment in the Datacard IDCentre software platform.eeds.
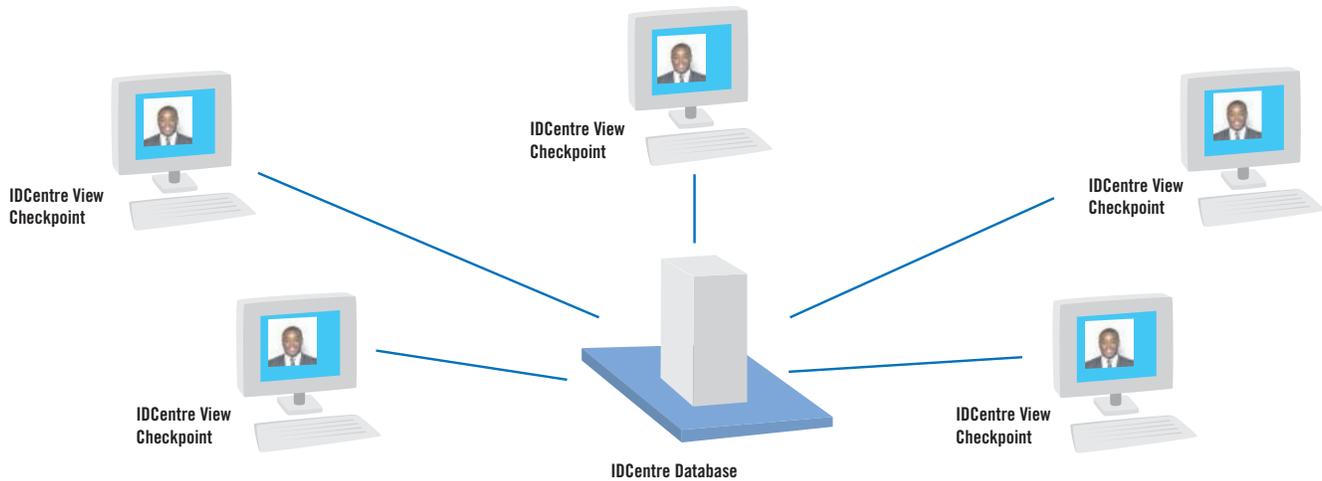

Powerful tools for ID confirmation

- Access the central image database of your IDCentre software, so you can perform an accurate on-screen identity verification.
- Easily confirm the identity of anyone entering your facilities, even those without ID cards.
- Retrieve, view and print real-time data about anyone in the database. Customizable records may include a name, photo and other details, such as a department name (corporate) or housing information (college campus).
- Allow HR personnel to access an employee's contact details, or enable employees to call up a new colleague's photo prior to a meeting.
