

Datacard® EZ-ID

HIGH-QUALITY IDS IN MINUTES

Out-of-the-box ID Solution

Perfect for basic ID programs

The Datacard EZ-ID System puts everything you need to issue high-resolution, color photo ID cards in one simple, quick-to-deploy package. The Datacard® SD160™ card printer, Datacard® TruCredential™ Software, webcam and supplies offer everything needed to create a custom ID program — without the high cost or complexity.

No-hassle setup

Intuitive guides make implementation a breeze for even the most non-tech-savvy. Just three easy steps:

- 1 Upload your card design
- 2 Take a picture with built-in photo capture
- 3 Click “print”

Add affordable security where you need it

The basic EZ-ID package offers UV printing capability, giving you an affordable way to add a hidden security feature.

Complete solution: proven technology and expertise

Entrust Datacard created the EZ-Card program to make it easy to implement and manage an ID card program. Proven hardware and software deliver reliable performance — and unmatched expertise is there when you need it.

Datacard®

What's in the Box?

- Datacard® SD160™ Card Printer
- Datacard® TruCredential™ Software
- YMCKFT UV print ribbon
- Logitech C920 HD Pro Webcam
- 250 blank white PVC cards (with magnetic stripe when appropriate)

Easy-to-Use, Complete Solution

1. Design Your Card

Powerful, flexible and user-friendly, TruCredential Software provides the core tools you need to easily design and manage data for ID cards. This custom version of TruCredential Express offers easy set-up through the QuickStart Wizard or the ability to simply design a card from beginning to end.

- Create card layout and designs
- Capture and manage data
- Add logos and other graphics
- Utilize intuitive point-and-click navigation
- Add bar codes & magnetic stripe data (optional)
- Easily upgrade when your needs grow

2. Take Picture

Web camera captures a photo with the simple click of the mouse.

- Take pictures quickly and easily
- Attaches easily to computer monitor with flexible clip
- Create crisp images at 1.3 megapixels

3. Click "Print"

- One-sided (simplex), high-resolution card printing
- Edge-to-edge printing
- Color, monochrome and UV printing capabilities
- Rewrite capability (special cards required)
- Alphanumeric text, logos and digitized signatures; 1D/2D bar code images
- Automatic 100-card input hopper
- Intuitive LCD panel with soft-touch controls
- Optional 200-card input hopper and 100-card output hopper (must be ordered separately)
