

ISG™ On Demand Labels

ISG's On Demand Label System Saves Time and Money While Ensuring Patient Safety!

Automated Patient Labeling System

Patient labels are a vital part of healthcare. A variety of items are required to have barcode patient labels. These labels must be accurate and legible.

The creation of labels in healthcare today is problematic. Sheets of labels are expensive to print and result in waste. Excess printed labels must be destroyed. The cost for sheets of labels and associated toner is high. The option to sheets of labels is thermal printers; however, the employee must log-in to their computer workstation, select the patient, select the printer, and print. This can be a long process simply to print one or two labels.

The ISG™ On Demand Label system solves these problems. Simply scan the patient chart label to instantly print one or more labels. The chart label, printed in registration, contains a 2D barcode with all the patient information. A time/date/location stamp can be printed on each label.

You save time and money! In addition, patient safety is improved because you know the label is current and accurate!

Identification Systems Group

The ISG™ is a nationwide network of local experts in identification, security, and card personalization, providing high quality, cost effective solutions backed by local support and the strength of our Professional Services Certification program. Each company works together to provide seamless nationwide support and collaboration in the identification and card issuance industry.
