Rippa™ Ribbon Shredder

Protect identity information by shredding used card printer ribbons and foils with this adapter to a standard office paper shredder

Millions of plastic cards are personalized for cardholders by printing or embossing personal, confidential, identification information. Thermal printing ribbons and embossing topping foils carry an image of the confidential information such as name, account numbers, expiration date, etc. All card issuers should shred the used ribbons to protect the identity information of the card holder and to protect themselves from potential liability arising from stolen ribbons.

The Rippa™ can be used with most top-fed office shredders to destroy these ribbons and the confidential information they contain. The Rippa™ will feed up to four rolls of printer ribbon or topping foil by threading between two rolls of standard, commercially available paper.

Key Features

- Attaches to any top-feeding office paper shredder
- Uses standard 4.5" wide rolls of paper
- Simultaneously shreds up to 4 rolls
- Magnetic fittings enable quick, easy side loading of ribbons & paper
